Ayurvedic Therapy

Ayurvedic Massage

Ayurveda is an ancient Indian holistic system achieving physical and mental harmony. It has been practised for 5000 years. Ayurveda means 'science of life' and its objective is to restore and maintain health.

A consultation is done before every treatment to find out what body constitution you are.

There are three body types according to Ayurveda and they go by the names of 'Vata', 'Pitta' and 'Kapha'. Each is ruled by the four elements in different quantities: these are Earth, Fire, Air and Water.

Depending on which constitution you are is to how your massage is performed and which oil is used. Pulse and tongue diagnosis are also performed to enable us to make the treatment at its most beneficial and tailor made for you.

All treatments are performed with warm herbal oil. Balance your equilibrium.

Holistic therapies are not only a stress release, but can prevent ill health and calm the mind and body.

Aromatherapy

Essential oils are extracted from natural substances eg, fruit, plants and trees. Each oil has its own unique property to help aid and ease symptoms of illness and stress as well as aches and pains.
